

# Nederlandse Commissie voor Stralingsdosimetrie

Netherlands Commission on Radiation Dosimetry

# Welcome

To the 6<sup>th</sup> NCS Lustrum

# A Little History

- NCS started officially in 3 September 1982
  - Current chair: Jeroen van de Kamer (NKI-AVL, Amsterdam)  
In total 11 members
  - <http://www.stralingsdosimetrie.nl/mission-statement.php>
- NCS platform re-vitalised 29 April 2010
  - Current chair : Kees Visscher (RIF, Leeuwarden)  
In total 13 members
  - <http://www.stralingsdosimetrie.nl/stralingsbescherming-in-het-ziekenhuis.php>

# Evolution of NCS Reports

- (Almost) all reports freely downloadable:  
<http://www.stralingsdosimetrie.nl/ncs-report.php>
- Initially:
  - Description of level of expertise in the Netherlands
  - Much on Radiotherapy
- Currently
  - Description what **should** be the level of expertise in the Netherlands and abroad
  - More on QA in general
  - More Radiology

# Reports since 2007

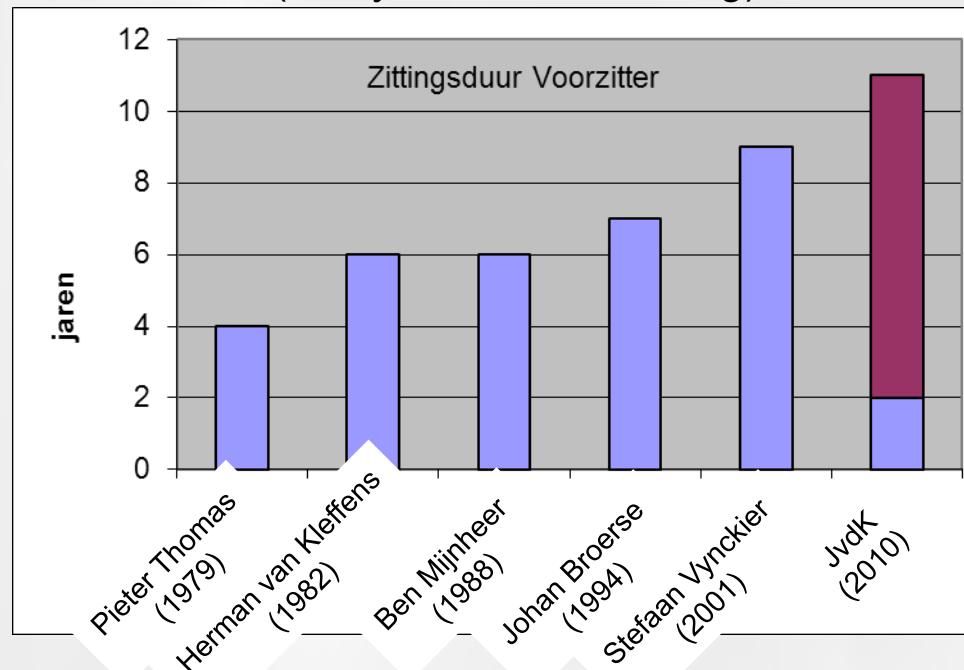

21. Diagnostische referentieniveaus in Nederland.
20. Dosimetry and quality control of brachytherapy with low-energy photon sources (125I).
19. Code of practice for personal dosimetry of professionals wearing protective clothing during radiological procedures.
18. Code of Practice for the Absorbed Dose Determination in High Energy Photon and Electron Beams.
17. Dosimetrie in de Radiologie: Stralingsbelasting van de Patiënt en Werknemers.

# The NCS Board

<http://www.stralingsdosimetrie.nl/all-members.php>

- NCS Board:
  - So far, ~40 former or present board members
  - Some for a long period
    - Hans Zoetelief (>20 years)
    - Frits Wittkämper (>18 years, and counting)
    - Dirk Zweers (>17 years, and counting)

# But Enough of that, Let's Start

- Diagnostic Reference Levels
- Dosimetrie in de Nederlandse borstkanker
- In-vivo dosimetry in brachytherapy: techniques and rationale
- Patient-specific QA using 3D EPI<sup>CT</sup>: future becomes reality
- In-vivo dose verification for proton therapy
- High and low dose regions in normal tissues in IMRT
- Late effects after radiotherapy in childhood cancer survivors
- Cell survival following dose rate flattening filter free and conventional irradiation
- Cataract formation vs radiation dose:  
see: [www.radiationdosimetry.org](#)
- Only Hp(3): need to reanimate the patient?

**Have a pleasant and stimulating day**
